

Shreyas Gowda B

• Glasgow, Scotland, UK - G4 0DS • gowdashreyas364@gmail.com • +447721609323 • [LinkedIn](#)

Profile

AI Business Analyst and Delivery-focused Data Scientist with strong experience in AI-powered process automation, data governance, explainable machine learning, and enterprise analytics delivery. Proven ability to translate business problems into AI solutions, lead requirements definition, support testing and implementation, and work with cross-functional engineering and business stakeholders. Experienced in ServiceNow automation, metadata governance, model monitoring, and AI explainability with strong communication and documentation skills. Currently completing an MSc in Data Science at the University of Glasgow.

Education

UNIVERSITY OF GLASGOW

Glasgow, Scotland
MSc Data Science

Batch of 2026

SDM INSTITUTE OF TECHNOLOGY

Ujire, DK
Bachelor's Degree, Artificial Intelligence and Data Science.

Batch of 2025

Experience

EDUDIAGNO

Data Analyst

Bangalore, Karnataka
January, 2025 – Ongoing

- Built and maintained production data pipelines using Python and SQL to support ML workloads across distributed systems.
- Implemented data quality automation and governance controls, improving reliability of enterprise datasets.
- Developed an internal metadata catalog and lineage platform, increasing transparency and explainability of data flows.
- Standardised schemas for structured and semi-structured sources to enable scalable multi-source ingestion.
- Collaborated with product, engineering, and business teams to translate requirements into technical solutions.

UNIVERSITY OF GLASGOW

Reach Out IT Student Ambassador

Glasgow, Scotland, UK
January, 2025 – Ongoing

- Provide frontline enterprise IT support to students and staff, resolving software, hardware, and access-related incidents.
- Troubleshoot application and system issues, escalating complex cases in line with IT service and security procedures.
- Support user onboarding and access management while adhering to data protection and governance standards.
- Document incidents and resolutions, contributing to service knowledge bases and continuous service improvement.

PUBLICIS SAPIENT

Data & Automation Consulting Intern (Merged Role)

Boston, USA (Remote) & Bangalore, India

November 2023 – December 2024

- Supported enterprise AI-driven automation platforms integrated with ServiceNow.

- Conducted process analysis and data mapping across ESG, sustainability, and operational datasets.
- Built metadata tagging and governance components to improve dataset traceability and explainability.
- Worked within Agile teams, contributing to sprint execution and solution design.
- Validated data pipelines, transformations, and automation outcomes through structured testing

GRAPHGEO

Bangalore, Karnataka

Data Analyst Intern

June, 2023 – August, 2023

- Analysed large-scale geospatial datasets using Python and SQL, improving query performance by ~15%.
- Enhanced metadata standards and dataset documentation to improve reuse and clarity.
- Supported consistent data preparation and ingestion into production analytical systems.

Projects

Personal Portfolio Website

- Built a full NLP pipeline using FinBERT and sentence transformers to extract sentiment, volatility, and forward-risk indicators from financial news.
- Engineered entity-level polarity, topic embeddings, and time-weighted risk features for downstream prediction models.
- Deployed a LightGBM predictive model with explainability delivered via SHAP and LIME text attributions for non-technical stakeholders.
- Addressed class imbalance (~8:1) using SMOTE and stratified cross-validation, achieving stable out-of-sample performance.

Backend Analytics & Data Services Platform (Independent Project)

- Built a backend-focused analytics platform using **FastAPI** to serve curated datasets and metrics via **REST APIs**.
- Implemented data ingestion and transformation logic using **Python and SQL**, supporting structured and semi-structured data sources.
- Applied basic data validation, schema checks, and error handling to improve **data reliability and consistency**.
- Designed services with a modular structure aligned to **microservice-style principles** for maintainability and scalability.
- Added logging and simple monitoring to support troubleshooting and stable operation during development and testing.

Skills & Interests

AI & Data Science:

Machine Learning, NLP, LLMs, Prompt Engineering, Model Explainability (SHAP, LIME), Drift Monitoring, Feature Engineering, Data Quality, Data Governance, Metadata Management, Data Cataloguing

Programming & Systems:

Python, Java, C, C++, SQL, JavaScript, React, Node.js, Django, REST APIs, Git, CI/CD

Delivery & Analysis:

Business Requirements Gathering, Process Analysis, Test Scenario Design, Data Mapping, Documentation, Stakeholder Communication, Agile Delivery, DevOps Practices, Continuous Service Improvement (CSI)
